

CLIPSO DESIGN

CEILING & WALL

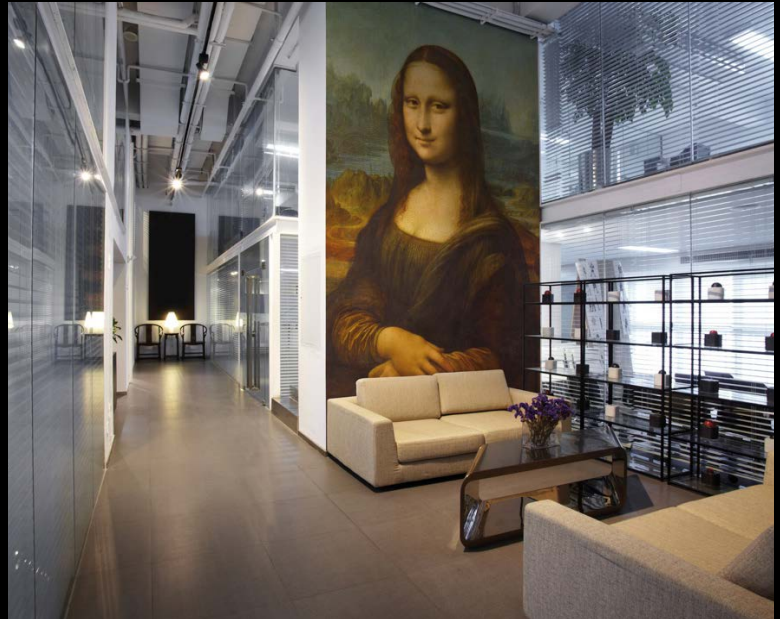

Printed decors that look great

Introduction

Large-sized printed fabrics have become extremely popular for interior design and communication!

CLIPSO technical fabrics can be adapted to suit all architectural styles and even the most varied sites and buildings. Thanks to their extra width of 5m, these coverings are unique for their ability to be fitted as a single piece: no joins, seams or stitching!

Whether you are architect, decorator, interior designer or set designer, etc., our extensive range will meet all of your technical requirements in addition to the standards imposed by construction regulations.

Waiting room - Application: printed wall

Complete, fully-customisable services

We propose complete and fully customisable services. Our team offers a varied range of services to meet your printing requirements:

- working with images with a good basic definition level to adjust them to the scale of your project;
- displaying images in a given area;
- colour modifications;
- image editing;
- HD printing.

Thanks to CLIPSO DESIGN, thousands of printed walls and ceilings have been installed in public areas including: hotels, restaurants, shopping centres, museums, service sector companies, hospital facilities and event sites but also in private homes.
